

2017 Summer Technology Institute for Educators

Opportunity for Graduate Credit or Professional Development

The course is for educators seeking to enhance their knowledge and skills in educational technology to support teaching and learning. It is designed to meet the needs of a wide variety of educators and educational technology skill levels.

Course includes:

- Morning strands to allow for focused study of literature, research, and best practices with regards to educational technology
- Afternoon workshops that will allow participants to select sessions on pedagogically driven practices for technology integration
- Opportunities for networking, sharing, and building a community of practice
